

Safer retail

As the retail industry continues to evolve more and more with digitalisation, brickandmortarstoresmustadapt tothe rapidly changing consumer preferences allwhile enhancing the in-store guest experience. The rise of e-commerce demands that retailers innovate more and more to remain competitive - integrating digital tools, keeping customers and associates safe, managing inventory all while combating theft and fraud is just the start.

Bundle your technology for a safer and more connected store

From the back of house operations to curbside pickup

Whether it's a delivery truck parking in your loading zone or an employee arriving to open your store, prepare your teams for any challenge by connecting your critical communications, video security, body cameras and data & analytics with the Motorola Solutions safety and security ecosystem. With our safety and security ecosystem, we can help by partnering with stores, like yours, to not only help reduce loss prevention, but protect your greatest assets – your associates and customers.

If you need help with	Our ecosystem provides
Store insights	Real-time data and analytics to enhance store operations and efficiently allocate resources
Combating theft and reducing shrink	Automated workflows to expedite panic responses, keeping associates and assets safer
Enhancing customer experience	Connected devices for safer experiences and seamless customer operations
Organized retail crime response	Efficient and seamless communication, video and analytic tools under a connected platform
Complete staff and store protection	Full visibility of your store's interior, exterior, parking lots and surrounding areas

Check out how we can help in reclaiming ownership of your store

Customised communications from the farthest parking stall to the customer service desks

- Use direct call, call all or scan and mute to make sure your message goes to the right associate or group for minimal disruptions and noise for customers
- Send store-wide announcements to all associates with the single push of a button when a safety or security concern arises
- Connect your associates as truck drivers arrive at the loading docks, minimizing wait times
- Mass alerting and messaging in the event of a weather event or other emergency

Extensions to your fixed-video camera solutions

- Visible or a more discreet body camera, not only to deter shoplifting and minimize loss prevention and shrink, but to also keep associates safe in the event of an escalation with first-person video
- Sensors to detect vaping, smoking, loitering, as well as water leaks in restrooms that automatically notify the appropriate associate via two-way radio
- Monitor freezer and refrigerator temperatures with sensors to remain stable and prevent food waste, automatically alerting associates if temperatures drop
- Geo-fencing capable sensors which automatically shut-off body cameras within range of a bathroom or other sensitive location

Bring data and analytics to all aisles and corners of your store

- Near-by associates receive an alert of a call-button being pressed for a quicker response to a customer need, all while receiving response times for in-depth coverage insights
- Automatic detection of spills within store aisles to alert an associate assistance is needed and help with liability claims
- Spot repeat shoplifters when they enter the parking lot, before they enter your store
- Sensors to detect elevated, aggravated voices and calls for help, in case an associate or customer is under duress
- Cameras with capability to record after-hours for vandalism and theft prevention for 24/7 situational awareness
- Alerts sent automatically to radio devices in the event of a crowd formation, to help with cashier allocation

Key ecosystem components recommended for safer retail

Avigilon video security & access control

Having a visible, objective, unbiased witness matters. Our body cameras can capture evidence-grade video of any situation, from security guards to machine operators.

- Complete situational awareness
- Cloud versatility
